

# **NCPCA Suggested FY2020 Budget Priorities**

City budget should not include funding for Hollywood Farmers Market until its Board of Directors shows they are operating in conformance with their Bylaws.

City Budget should include funding for solar-powered illuminated stop signs that flash when drivers approach, as are now installed on Montgomery Road in Laurel.

City budget should include street signs that alert solicitors of the requirement to obtain a City permit, as are now installed in Berwyn Heights.

City budget should include funding for 15 additional Doggie Depot poop stations.

City budget should include funding for a speed hump at 52nd Avenue and Narragansett Parkway.

City budget should include funding for security cameras and expand the area of concurrent jurisdiction of U.M. Police on north and west sides of College Park.

City budget should create a permanent staff position for the office of City attorney, rather than hiring consultant staff for the position.

City budget should include funding for exploring construction of a community center building in North College Park, and to allow community program delivery at Youth and Family Services in the meanwhile.

City budget should include funding for a pilot study of a neighborhood food composting facility in College Park.

City budget should include funding and obtain grants to develop a pilot coupon program for use of seniors and low income residents when making food purchases at Hollywood Farmers Market.

City budget should include funding for summer internships to engage neighborhood youth in civic programs and service projects in College Park.

City budget should include funding for summer internships to engage neighborhood youth in a neighborhood survey program to identify infrastructure problems for review and correction in College Park.

City budget should subsidize the cost of security cameras on homes and other private property with agreements to allow police to view images upon request.

City budget should include a groundwater study in North College Park to identify problems of surface flooding, ponding, mosquitoes and mud, and to fund necessary improvements, or to make improvement requests to the County.

City budget should include funding for a comprehensive study of existing infrastructure and all development that is underway and planned in College Park.

City budget should include funding for a resident-oriented City emergency evacuation plan.

City budget should include funding for a new survey system for in-house customer relations management.

City budget should include funding for the City Manager to improve transportation options in College Park that do not require the use of US 1, and to explore methods such as parking, road construction, bike lanes, sidewalks, development requirements, etc. to reduce traffic on US 1.

City budget should include funding for consolidated in-house or consultant-provided architectural and engineering services as a way to reduce costs, reduce the time required for studies, and to improve the delivery of City projects.

City budget should include funding for a consultant to review City procurement processes and purchases, and to optimize departmental duties and procedures of City.
